ClubHub

A place for students to come together and connect over things they have in common

By: Nathan Cai, Ronniel Gandhe, and Nicole Hernandez

01

SERVICE

We will talk about our motivations and the product itself.

02

SOLUTION

Moving into what solution it provided by our product and why it is unique in comparison to other programs.
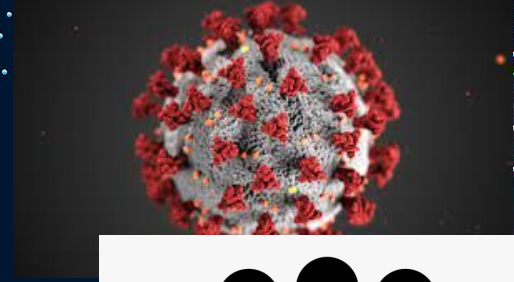

03

FUTURE IDEAS

Concluding with how we would want to advance this product into something bigger and scalable with additional features.

Motivation for Project

We Created **ClubHub** because…

- Hard to meet new people due to covid.

- Easier to make friends when you have similar interest within your community

- A place where people can also learn and grow

What is ClubHub ?

- A platform for students to create and join clubs and meet people with similar interests

- Students can network and collaborate on innovative ideas.

Time for the Demo

ClubHub
Future Ideas

INCREASING
CONNECTIVITY

We would want to push our program to be more international and connect people from all around the world.

ClubHub
Future Ideas

CHAT & CALL FEATURE

Currently, our service does not offer a built in call/chat feature, and instead links to different services that do. We would want a built in chat/call feature for our own software.
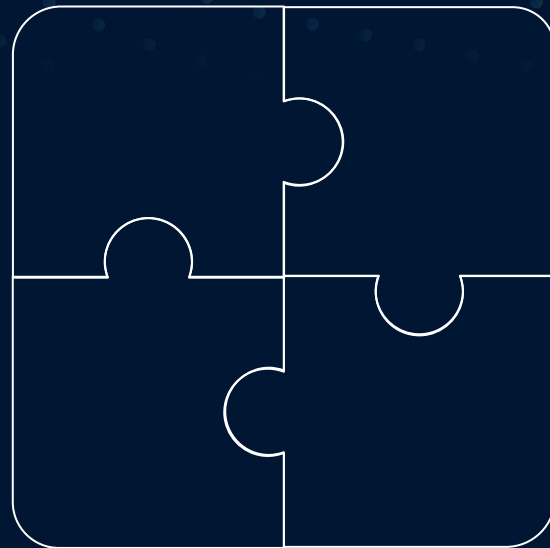

ClubHub
Future Ideas

Increasing Organizability

We would want to help Club Owners organize, and give them space to add their websites, about us sections, schedules, images, and more information they think people should have before joining.
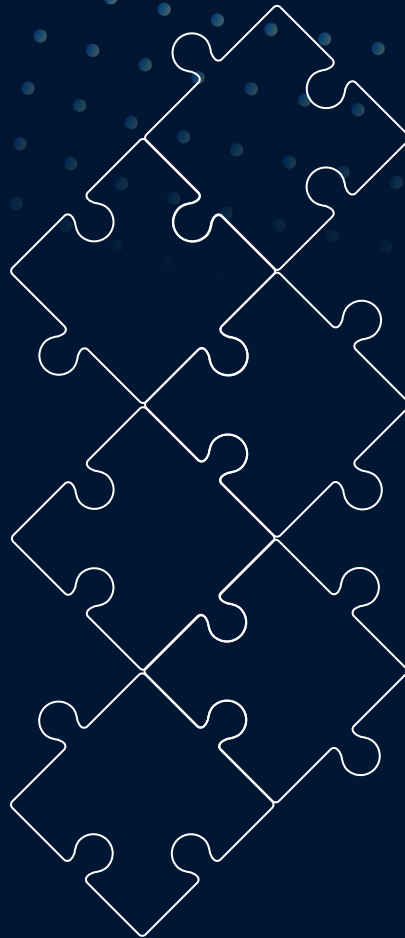

ClubHub
Future Ideas

Increasing Customizability

On top of making club owners have more control over club visuals, we would want our users to be able to customize their profiles and add things about themselves that they would like to share.

Easy, Accessible, Streamlined.

Thank You for Listening

We all hope you enjoyed our presentation and idea.
